PROFESSIONAL SUMMARY

I am a Software Engineer with a strong passion for learning new things related to technology. I have 2 years of experience involved in the Freelancer project and working as a programmer. I'm used to working with several JavaScript frameworks including React JS, Vue JS and also I have some experience working on a project using CodeIgniter and Laravel. In my spare time, I actively participate in webinars and community forums related to Software Engineering.

WORK EXPERIENCE

Diskominfo Bandung | Frontend Developer
Maret 2020 - Present

1. Pusicov Bandung: <https://covid19.bandung.go.id/>
Pusicov is the website of covid information center of Bandung City. In this project, my responsibility is to make a public website display using React JS so that the component is reusable and the rendering process can be quickly executed and also to display the API data built using MongoDB and Golang.

2. JPS Bandung: <https://jps.bandung.go.id/>
JPS is a website that serves an existing data on social assistance in Bandung City. In this project, my responsibility is to make a website using React JS to make it component reusable and fast rendering. Afterwards, I display the API data that is built using MongoDB and the Golang language.

EDUCATION

Magister System Information
Universitas Komputer Indonesia | 10/2018 - 10/2020

Thesis: Designing an Enterprise Architecture use TOGAF Adm and Critical Path Method on Project Management (Case Study: CV Aksata Creative Design).

Teknik Informatika
Universitas Komputer Indonesia | 08/2009 - 03/2014

Thesis: Cotton Fabric Forecasting System at CV. Perajutan Sahabat

OTHER PROJECTS

1. E-katalog ditlog ITB | Frontend Engineer | 2019
The e-catalog is a logistics website for goods submissions to the specified vendor. My contribution for this project is to create FrontEnd Public web using jQuery, Bootstrap and CodeIgniter 3.

2. Sikerja Ditlog ITB | Backend Engineer | 2019
Sikerja is a Cross Platform Web App at the ITB directorate to make it easier for a work division to assess vendors. My contribution for this project is to create a BackEnd API using CodeIgniter and MySQL, especially in the Appraiser user role, displayed on the Frontend as a form of a Mobile App built with React Native technology.

3. Surplus Startup | Backend Engineer | 2019
Surplus is a startup company engaged in the sale of food. My contribution in this project is to create a BackEnd API using Laravel and MySQL, especially in the Customer role API, which will be presented on the Frontend in the form of a Mobile App with React Native technology.
